

This publication contains Parts Information for all 1988 and 1989 Trucks with the exception of parts information on RAM D50 (See Import Catalog). For F.W.D. trucks (See Passenger Car Parts Catalog).

The use of this Parts Catalog and the arrangement of information herein is explained in the General Information Section as indexed below.

HOW TO USE THIS CATALOG AND LOCATE PARTS

This Catalog is divided into Part Groups in which illustrations for parts of a similar function and/or location are published. The Group Contents listing on the next page shows the type of parts contained in each group. Tabs are provided or available to separate each group.

Several methods may be used to locate a specific part:

Option 1: From the Group Contents listing, select the group which would most logically contain the part to be found. Open the catalog to the beginning of that group. The first page of the group will contain an index of illustrations. Select the illustration most likely to contain the part. Turn to the selected illustration and locate the part by reviewing the illustration item numbers and associated text information following the illustration.

Option 2: If the "noun" name of the part you seek is known, an alphabetical index of Nouns and Illustration titles is provided to assist in finding the part. Several keys may be found in this index.

|   |                             |
|---|-----------------------------|
| <b>RESERVOIR</b> , Power Strng. Oil Pump. .Group 19 | Group Reference             |
| <b>ALTERNATOR</b> , Cummins Diesel . . . . .8-1600  | Illustration Reference      |
| <b>BELT</b> , Front Seat N Body. . . . .ITB-1000/3  | Illustration/Item Reference |
| Group _____   |                             |
| Illustration No. _____                              |                             |
| Item _____  |                             |

Option 3: If the part number is known but the applications need to be determined, refer to the numerical index. This index shows the group, illustration number and item for each part listed in the catalog. Multiple references mean the part is listed more than once.

## PART GROUP - TITLES & CONTENT

## PAGE NUMBERING

Two-part page numbers are used throughout this catalog. The first part of the page designation indicates one major group or section. The second part indicates the actual page number in the group. For example:

2-1 indicates Group 2, Front Suspension, Page 1  
3-4 indicates Group 3, Axle Rear, Page 4

In the maintenance of the Loose Leaf Parts Catalog Revision Service, it may become necessary to add information beyond the capacity of the page. In this event, an "A" page will be used. For example, if it becomes necessary, because of change, to add several part numbers to page 2-1 and space does not permit the addition, you will be given Page 2-1A. Page 2-1A should be filed immediately following Page 2-1.

Figure and Item Numbers are also commonly used to identify locations in this Catalog, i.e., 14-900/8 refers to Group 14, illustration 900, Item Number 8. Illustration Numbers are always ascending sequential within the Groups.

## RIGHT AND LEFT PART NUMBERS

Right and Left part numbers are frequently combined on one line, e.g. 3514 444-5. Such numbers are interpreted as 3514 444 Right side application and 3514 445 Left Side. Right and Left Sides are always determined by their relationship to the driver when normally seated and looking forward.

## SYMBOLS USED IN THIS PARTS CATALOG

The following symbols are commonly used with Part Number and quantity information in this Catalog:

# — Preceding a part number indicates parts which have been added and not previously published.

AR — Indicates the quantity required may vary or is to be determined by the user.

## SPECIFYING INFORMATION

The following information is included in this Parts Catalog:

1. Part Name
2. Part Number
3. Model Application
4. Quantity used per vehicle
5. Description and dimensions necessary for proper identification of parts where necessary
6. Model or Engine Column:  
Engine by Displacement or Vehicle Model  
Code Body Style Code or Price Class.
7. Effective points of model year running changes are indicated by vehicle serial number, engine number or body number where applicable. When serial number effective points are not available, production effective dates are used. (Refer to the Federal Certification Label for the build date).
8. Parts designated as CANADA or EXPORT are not available through US parts outlets.

In the event replacement parts not listed herein are required due to a special service situation, Dealers should contact their factory specifier for assistance. Problems encountered with peculiar part specifications can be resolved in the same manner.

## ILLUSTRATION INDEX

This index is a compilation of catalog parts description data with reference to illustrations, figures and key numbers as shown:

| ILLUSTRATION INDEX | GROUP | ILLUS. NO. |
|--------------------|-------|------------|
| FENDER D. W. ....  |       | 23A-1400   |

The first page of each group contains a listing of all illustrations within that group. Also refer to illustrations alphabetically listed in information section.

## ALPHABETICAL INDEX

This index is a compilation of catalog parts description data with a reference to the location of the item by group - Figure and key number as shown in the following example:

|                  |               |
|------------------|---------------|
| Housing, w/Pump  | 7 - 1500 / 18 |
| Group            |               |
| Illustration No. |               |
| Item             |               |

The index will be expanded progressively as data is added to computer files. To locate a part by name, refer to the Alphabetical Index. This indicates the group and illustration and item number where the part is located. Alphabetical Index can be found in INF section of catalog.

## NUMERICAL INDEX

A listing of Part Numbers contained in the catalog. The numbers are in numerical sequence with reference to the group and illustration and item number where the part is located.

## PARTS PACKAGES

Service Parts Packages, containing all parts needed for specific service operation, are listed in their respective groups with related parts. The listing will show adaptability and model application.

## STANDARD PARTS

Important attaching standard parts such as bolts, nuts, etc. are generally listed in the text of the respective major parts groups.

## COLOR CODED OR COMBINED PART NUMBERS

Appearing throughout this catalog are part numbers containing both letters and numbers. For example: D500 KB7. These are good serviceable part numbers. The combination of letters and numbers merely indicates the parts are keyed to the interior color of the vehicles on which they are used.

In addition, Right and Left part numbers are frequently combined on one line; e.g. D500-1 KB7. Such numbers are interpreted as D500 KB7, Right side application, and D501 KB7 Left side. Right and Left Sides are always determined by their relationship to the driver when normally seated and looking forward.

## INTERIOR TRIM

Refer to the Group IT, Interior Trim section of the catalog, for information relative to Interior Soft and Hard Trim, Rolled Stock, etc.

## TRANSMISSION IDENTIFICATION

### MANUAL TRANSMISSION

(Example PP23044360001)

| PLANT CODE                        | COMPONENT CODE   | DATE CODE                          | SERIAL NUMBER  |
|-----------------------------------|--|------------------------------------|--|
| 2 letters                         | 3 digits   | 4 digits                           | 4 digits   |
| PP - New Process<br>Gear Division | 230 - 230 trans.<br>250 - 250 trans.<br>833 - 833 trans. | Based on the calendar<br>on INF-13 | A sequential number<br>beginning with 0001<br>for each day's<br>production |

Location: Below centerline on Front Portion of Right Side

### AUTOMATIC TRANSMISSION

(Example PK3681063W44360001)

| PLANT CODE  | PART NO. | CHANGE CODE   | DATE CODE                             | SERIAL NUMBER   |
|-------------|----------|---|---------------------------------------|---|
| 2 letters   | 7 digits | 1 digit   | 4 digits                              | 4 digits  |
| PK - Kokomo | 3681063  | W<br>(Factory use only<br>of no significance<br>to the field) | Based on the<br>calendar on<br>INF-13 | A sequential number<br>beginning with 0001<br>for each day's<br>production. |

Location: On Oil Pan Side Rail-Left Side.

**NOTE:** A derivative of the Vehicle Identification Number is also stamped on all production installed Engines and Transmissions, e.g.:

|            |                |                         |
|------------|----------------|-------------------------|
| J          | A              | 1000001                 |
| Model Year | Assembly Plant | Vehicle Sequence Number |

## ENGINE IDENTIFICATION NUMBERS

Following is an explanation of data found on the Engine Serial Number Pad

**2.2L, 2.5L Engine Typical:** 7 T 22 PT 6926 1  
 Model Year \_\_\_\_\_ Shift Built  
 Engine Plant (Trenton) \_\_\_\_\_ Date Code (10,000 Day Calendar)  
 Displacement (Liters) \_\_\_\_\_ Engine Usage

**3.9L, 5.2L & 5.9L Engine Typical:** B 318 1024 2579  
 Model Year and/or Plant \_\_\_\_\_ Daily Sequence Number (Optional)  
 Displacement \_\_\_\_\_ Date Code (1024 = Oct. 24)

## 4 CYL., 6 CYL. AND 8 CYLINDER ENGINE SERIAL NUMBER & PARTS IDENTIFICATION CODES & SYMBOLS DEFINED:

**A** = Oversize Cylinder Bore      **LC** = Low Compression      **S** = Special Engine  
**E** = Cast Crankshaft      **M** = Mound Road Engine      **T** = Trenton Engine/Truck  
**H** = Standard 4 Bbl.      **PC** = Passenger Car Engine      **W** = Windsor Engine  
**HP** = High Performance      **R** = Passenger Car Engine      **X** = O/S Valve Guide  
**K** = Toluca Engine Plant

**DIAMOND** ( ) = O/S Tappets      **MALTESE CROSS** (+) = 001 U/S Crankshaft x followed by MALTESE CROSS (X +) = .010 U/S Crankshaft

| Engine Number Location | Displacement | Serial Number Pad Located               |
|------------------------|--------------|---|
|                        | 2.2L         | Rear Face of Block, below Cylinder Head |
|                        | 2.5L         | Rear Face of Block, below Cylinder Head |
|                        | 3.9L         | Left Front of Block below Cylinder Head |
|                        | 5.2L         | Left Front of Block below Cylinder Head |
|                        | 5.9L         | Left Front of Block below Cylinder Head |

**CAUTION:** Replacement Engine Assemblies are furnished with blank engine number pads. Dealers are governed by state and local regulations regarding the affixing of engine numbers to these engines. In states where license fees are based on displacement or taxable horsepower it will be necessary to change the vehicle registration only if the replacement engine differs from the one it replaces.

## GENERAL INFORMATION

### Vehicle Identification Number

The vehicle identification number consists of a combination of seventeen letters and numbers. The first six elements identify the model, body type, GVW class, engine, model year and assembly plant.

The last element indicates the plant building sequence. All models will begin with 100001. The Vehicle Identification Number is located on the Vehicle Identification Plate, Equipment Identification Plate, and the applicable U.S. Federal Motor Vehicle Safety Standards "Certification Label" and Frame Rail. (Figs. 1, 2 and 3), refer to V.I.N. Chart for code and sample V.I.N.

### Vehicle Identification Plate

The vehicle identification plate as shown in (Fig. 1) is attached to the rear face of the drivers door, or on the "B" post, on all models.

Fig. 1 — Vehicle Identification Plate  
Equipment Identification Plate

The equipment identification plate as shown in Figure 2, contains information regarding the vehicle: model, wheelbase, V.I.N. (Vehicle Identification Number), T.O.N. (Order Number), and all production or special equipment on the vehicle when it is shipped from the factory. Always refer to this plate when ordering parts. The location of the equipment identification plate is on the hood inner surface.

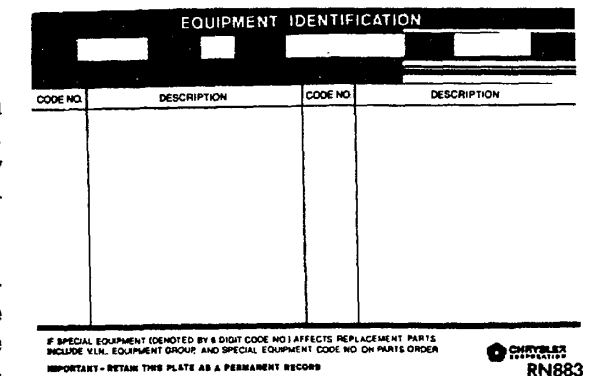

Fig. 2 — Equipment Identification Plate  
Vehicle Safety Certification Labels

A vehicle safety certification label, Figure 3, is attached to the rear facing of the drivers door on all models. This label reflects the date of manufacture numerically month and year in the upper right hand corner, Gross Vehicle Weight Rating (GVWR), Gross Axle Weight Rating (GAWR) front, Gross Axle Weight Rating (GAWR) rear and Vehicle Identification Number (VIN). A Month-Day-Hour (MDH) number is included on this label in the lower left hand corner which indicates a Month, Day and Hour manufacturing control point.

This label, when applied, verifies vehicle conformation to all applicable Federal Motor Vehicle Safety Standards in effect on the date of manufacture.

All communications or inquiries regarding vehicle should include the Month-Day-Hour and Vehicle Identification Number.

## SALES CODES

Due to the increase complexity of qualifications required to describe the application of some replacement parts; particularly those related to the Emission Control System, Sales Codes are used on a selected basis in some areas of this publication.

Normally, Sales Codes will be employed as secondary qualifiers and are for the express purpose of providing positive identification of parts applicable to vehicle components or systems so complex in nature that normal methods of written qualification are either inadequate or confusing.

The Sales code will always appear after the written description of the part; will be enclosed in parenthesis; will be prefixed S/C, and will follow a hyphen appended to the S/C, e.g.: (S/C-HAO).

To determine whether or not the vehicle for which the part is being specified was built with a particular Sales Code it will be necessary to refer to the Body Code Plate depicted on page INF-10. Sales Codes are also listed on vehicle invoices and on the Maroney label which is affixed to the side glass on new units.

NOTE: The definition of sales code used are listed below.

**EDA** - 2.5L & CYL 2bbl.

**EDE** - 2.2L 2 bbl. Gas

**EHB** - 3.9L EFI Gas

**ELG** - 5.2L EFI Gas

**ELP** - 5.2L 2 bbl. Propane

**EMC** - 5.9L 4 bbl. Gas

**EMG** - 5.9L 8 CYL. EFI

**EMH** - 5.9L 4 bbl. Gas

**EMJ** - 5.9L 8 CYL. HDC

**ETA** - 5.9L T/Diesel

**NAA** - Electronic Spark Advance w/Catalyst - Except California System. Used in conjunction with a Catalytic Exhaust System. Unleaded Fuel is required.

**NAB** - Electronic Spark Advance w/o Catalyst. Used in conjunction with a conventional Non-Catalytic Exhaust System. Unleaded Fuel is not required. Canada & Export.

**NAC** - Catalyst w/o Electronic Spark Advance. Standard equipment on some selected model and engine combinations. Used in conjunction with a Catalytic Exhaust System. Unleaded Fuel is required.

**NAD** - w/o Catalyst w/o Electronic Spark Advance. Primarily for Canadian & European Vehicles. Available in U.S. on some truck Models w/360 Eng. over 8500 lbs GVW.

**NAE** - Emission Control Testing and Label - Community Referred to as "California Emission Controls." Mandatory for designated engines on trucks sold in the State of California.

**NAF** - High Altitude Emission Control Pkg. Required for some truck lines and engine combinations sold in some geographical markets predominately above 4000 feet elevation.

**NBB** - Heavy Duty Cycle

**NCA** - Air Pump

**NCB** - Aspirator

**NDA** - Catalytic Converter

**NDB** - w/o Catalytic Converter

METRIC CONVERSION TABLE

LINEAR MEASUREMENT

**Figure 2-200**

This diagram illustrates the assembly of a vehicle chassis, showing various components and their assembly sequence. The components are numbered 1 through 39, and the assembly steps are indicated by dashed lines and arrows.

**Key Components and Assembly Steps:**

- 1, 2, 3, 4:** Top plate, upper control arm, lower control arm, and a pin/bush assembly.
- 5, 6, 7, 8, 9:** Upper control arm, lower control arm, and various bushings/pins.
- 10, 11:** Coil spring and coil spring plate.
- 12, 13:** Bushings/pins for the control arms.
- 14, 15, 16:** Shock absorber and its mounting components.
- 17, 18, 19:** Lower control arm, lower control arm bushing, and lower control arm plate.
- 20, 21, 22:** Lower control arm, lower control arm bushing, and lower control arm plate.
- 23, 24, 25, 26:** Various bushings/pins for the control arms.
- 27, 28, 29, 30, 31:** Sway bar, sway bar bushing, sway bar pin, sway bar plate, and sway bar plate pin.
- 32, 33, 34, 35, 36, 37, 38, 39:** Sway bar, sway bar bushing, sway bar pin, sway bar plate, sway bar plate pin, sway bar plate, and sway bar plate pin.

The diagram shows the assembly of the upper control arm, lower control arm, coil spring, shock absorber, and sway bar. The components are numbered 1 through 39, and the assembly steps are indicated by dashed lines and arrows.

### Figure 2-1600

This diagram shows an exploded view of a mechanical assembly. The components are numbered as follows:

- 1**: A large circular gear or flywheel with a serrated outer edge.
- 2**: A hexagonal nut.
- 3**: A rectangular plate with ten small circular holes arranged in two rows of five.
- 4**: A small circular washer or spacer.
- 5**: A small circular component, possibly a pin or a small washer.
- 6**: A small circular component, possibly a pin or a small washer.
- 7**: A small circular component, possibly a pin or a small washer.
- 8**: A small circular component, possibly a pin or a small washer.
- 9**: A stack of three coiled springs.
- 10**: A small circular component, possibly a pin or a small washer.
- 11**: A small circular component, possibly a pin or a small washer.
- 12**: A large octagonal frame with eight small circular holes around its perimeter.

**Figure 8-2600**

A diagram of a cell. It features a large outer oval representing the cell membrane. Inside this is a smaller oval representing the nucleus. Within the nucleus are two smaller circles representing nucleoli. A line points from a small circle labeled '1' to the nuclear envelope.

A diagram of a cell with three internal organelles labeled 1, 2, and 3. The cell is represented by a large oval boundary. Inside, there are three smaller oval structures. Structure 1 is a small circle on the left. Structure 2 is a larger oval at the top right. Structure 3 is a larger oval at the bottom right. A line connects the label 1 to its corresponding structure.

A diagram of a cell. It consists of a large outer circle representing the cell membrane. Inside this circle is a smaller circle representing the nucleus. Within the nucleus is a small, dense, circular structure representing the nucleolus. A line connects the nucleolus to a small circle containing the number '1'.

**« RETURN TO GROUP INDEX**

**Figure 13-900**

This technical drawing is an exploded view of a mechanical assembly, likely a hinge or a mounting bracket. It shows the following components and their assembly sequence:

- Part 1:** A long, curved metal plate or base.
- Part 2:** Two screws used to secure Part 1.
- Part 3:** Two pins or bushings that fit into holes on Part 1.
- Part 4:** A curved metal plate or base, similar to Part 1 but smaller.
- Part 5:** Two screws used to secure Part 4.
- Part 6:** Two pins or bushings that fit into holes on Part 4.
- Part 7:** A small metal plate or bracket.
- Part 8:** A small metal plate or bracket.
- Part 9:** A small metal plate or bracket.
- Part 10:** Two screws used to secure Part 9.
- Part 11:** A small metal plate or bracket.

The diagram uses dashed lines to indicate the alignment and assembly path of the components.

**Figure 14-700**

This exploded view diagram illustrates the assembly of a mechanical component, likely a pump or motor. The parts are numbered as follows:

- 1**: A small cylindrical component, possibly a pin or a small shaft.
- 2**: A spring-loaded plunger or valve assembly.
- 3**: A long, thin shaft or rod.
- 4**: A cylindrical component with a cable attached, possibly a solenoid or actuator.
- 5**: A flat, rectangular plate or gasket with a central circular opening.
- 6**: A large, complex housing or casing.
- 7**: A small cylindrical component, possibly a pin or a small shaft.
- 8**: A large, cylindrical component, possibly a motor or pump body.
- 9**: A small cylindrical component, possibly a pin or a small shaft.
- 10**: A small cylindrical component, possibly a pin or a small shaft.
- 11**: A small cylindrical component, possibly a pin or a small shaft.
- 12**: A small cylindrical component, possibly a pin or a small shaft.
- 13**: A small cylindrical component, possibly a pin or a small shaft.
